

CommonSpirit Kansas, Finney County (\$2,980,250)

- CommonSpirit Kansas will acquire and integrate essential, FDA-cleared diagnostic and surgical technologies, including two advanced Computed Tomography (CT) Scanners, six advanced surgical OR Tower systems with integrated video processors and SPY-QP fluorescence imaging, and one Portable X-ray unit with complementary applications.

UKHS Great Bend, Barton County (\$2,960,927)

- Wichita County Health Center, Rooks County Health Center, Beloit Medical Center, Coffey Health System, and seven Great Plains Health Alliance-affiliated hospitals will participate in the Rural Primary Care Orchestration Initiative to bring Lumeris' Tom™, a proven AI-enabled Primary Care as a Service platform, to rural primary care practices

Rooks County Health Center, Rooks County (\$1,704,066)

- Rooks County Health Center will implement Remote Patient Monitoring (RPM) services to clinic patients which will transform how primary care services are delivered to adults in rural northwest Kansas. Rooks County is a HRSA designated Health Professional Shortage Area (HPSA) for primary care; the RPM project will be a significant advancement in care services provided to rural and remote patients in the county.

Hospital District #1 Rice County, Rice County (\$1,377,990)

- Hospital District #1 Rice County will implement enterprise virtual desktop infrastructure with secure badge-tap single sign-on and more than 150 point-of-care workstations across its Critical Access Hospital, clinics, and clinical departments to give clinicians fast, secure EHR access while strengthening cybersecurity

GoodLife Innovations, Johnson County (\$1,169,246)

- This project will help rural Kansas providers deliver care to individuals with intellectual and developmental disabilities in a smarter, more efficient way through iLink Technologies, a proven technology-enabled care platform that has more than 25 years of real-world use and refinement. iLink combines assistive technology, secure software, and 24-hour remote support to ensure individuals receive the right support at the right time. This solution also allows providers to make better use of their existing workforce.

Via Christi Village Hays, Ellis County (\$1,145,446)

- Via Christi Hays will implement Jana, a proven clinical intelligence and care coordination platform, across its 16 participating rural skilled nursing and long-term care facilities.

Genesis Family Health, Seward County (\$1,059,190)

- Through strategic adoption and expansion of advanced technologies within its existing eClinicalWorks platform, GFH, a federally qualified health center, will create a fully integrated, data-driven care model that expands access, improves quality, enhances efficiency, and supports long-term sustainability through an AI-powered no-show prediction model, remote patient monitoring, a behavioral health module and AI-powered revenue cycle management.

Sumner Mental Health Center, Sumner County (\$975,334)

- Operating as a regional technology deployment hub in cooperation with the Sumner County Educational Services Interlocal 619, this initiative scales a proven, university-developed Extended Reality (XR) software solution (the VOISS Solution) directly into rural pediatric behavioral health and special education workflows. The project establishes a scalable, decentralized access model that addresses critical regional workforce shortages, eliminates multi-month service waitlists for early intervention services and intervention deficits, and establishes a self-sustaining post-grant financial infrastructure via insurance-reimbursed Remote Therapeutic Monitoring (RTM) that provides an implementation pathway for scaling this unique digital therapeutic to rural areas across the state.

Prairie View Inc., Harvey County (\$729,081)

- The Prairie View Rural Connected Care Initiative scales proven, already-deployed technologies to expand access to integrated healthcare, strengthen care coordination, and improve management of chronic physical and behavioral health conditions across a rural, medically underserved region of south-central Kansas.

NMC Health, Harvey County (\$662,642)

- NMC Health will implement an integrated rapid diagnostic microbiology platform anchored by Matrix-Assisted Laser Desorption/Ionization Time-of-Flight (MALDI-TOF) mass spectrometry. The proposed technologies will dramatically reduce the time required to detect and identify infectious organisms and guide treatment of serious infections, enabling physicians to make faster, evidence-based clinical decisions.

Attica Hospital District #1, Harper County (\$532,045)

- In partnership with Anthony Community Care Center and Kiowa District Hospital Manner (partnership comprises 100% of the Medicaid-certified nursing home capacity in Harper and Barber counties), Attica Hospital District #1 will implement a shared technology ecosystem spanning AI-assisted clinical decision support, resident monitoring, Cloud-based communication systems, operational workflow management & medication accountability technologies

Grisell Memorial Hospital, Ness County (\$350,000)

- Grisell Memorial Hospital will implement a comprehensive Philips Patient Monitoring System across all acute inpatient and emergency department rooms.

Valley Hope Association, Norton County (\$219,333)

- Valley Hope Association will deploy three AI-enabled technologies across substance use disorder treatment programs: an AI-assisted clinical documentation and compliance platform for approximately 80 clinicians, AI medication verification systems at three residential treatment facilities, and standardized telehealth and virtual connection stations

Meade Hospital District, Meade County (\$141,098)

- Meade Hospital District will implement Microsoft Dragon Copilot, an AI-powered ambient clinical documentation solution. This innovative technology will improve provider efficiency, reduce administrative burden, enhance patient access, and strengthen the long-term sustainability of rural healthcare services.
