Rural Health Transformation Program Year 1 Funding Amounts

On December 29, 2025, the State of Nevada initiated the Rural Health Transformation Program (RHTP) following the initial federal grant award of **$179,931,608.42** from the Centers for Medicare and Medicaid Services (CMS). Authorized under H.R.1 Section 71401 of the *One Big Beautiful Bill Act*, this five-year federal grant is designed to strengthen rural healthcare systems and mitigate the impacts of anticipated changes to Medicaid financing for rural hospitals and providers.

To ensure strategic and effective allocation of these Budget Period 1 (BP1: 12/29/25 – 10/30/26) funds, the Nevada Health Authority issued multiple Requests for Applications (RFAs), directing investments toward four core initiatives and four designated focus areas.

Core RHTP Initiatives

1. Rural Health Outcome Accelerator Program (RHOAP)
2. Nevada Rural Health System Flex Fund (FLEX)
3. Workforce Recruitment and Rural Access Program (WRRAP)
4. Rural Health Innovation and Technology (RHIT)

Targeted RHTP Funding

1. Rural Tribal Health Transformation
2. Rural Veterans Health Transformation
3. Rural Corrections Health Transformation
4. Presidential Fitness Test Implementation

This report provides a comprehensive overview of all projects funded during BP1 across both core initiatives and targeted RHTP funding categories. **Note:** The following list of subaward amounts may not be final as project budgets continue to be refined for CMS approval at the time of this writing (early October 2026).

Rural Health Outcome Accelerator Program (RHOAP)

RHOAP funding supports initiatives that advance value-based care and innovative healthcare delivery models aimed at preventing and managing chronic disease. Through a single RFA, the Nevada Health

Authority awarded funds to subrecipients committed to expanding access through hybrid and integrated care models; implementing targeted interventions to address chronic disease, primary and preventive care, behavioral health, and maternal and infant health; and incentivizing providers who demonstrate improved health outcomes within rural communities across the state. Funding requests totaling **$42 million from 64 applicants** exceeded the published $26.9 million available for this initial year of funding.

The 37 funded projects span universities, rural hospitals, rural nonprofits, consortium organizations, and six school-based behavioral health initiatives. Together, they represent a coordinated statewide effort to strengthen rural health systems and improve community well-being. Collectively, the projects enhance early identification of developmental, behavioral, and health challenges in young children, expand access to care in rural communities, improve patient safety, and bolster Nevada's ability to respond to public health threats. As a result, they contribute to improved health outcomes and greater health security for rural Nevadans.

Nevada Rural Health System Flex Fund (FLEX)

The Nevada Rural Health System Flex Fund is a core component of Nevada's Rural Health Transformation Program. This initiative provides essential financial support for capital investments and equipment modernization to strengthen rural healthcare infrastructure. FLEX resources are intended to increase facility capacity, enhance service delivery, and improve long-term sustainability for rural hospitals and healthcare providers statewide. Funding requests totaling **$180.7 million from 103 applicants** *far* exceeded the published $35.9 million available for this initial year of funding. Funding was strictly prioritized for direct, frontline rural health care facilities and providers and all applications were scored independently based on the matrix provided in the RFA. NVHA final decisions strictly followed these competitive merits. The funded projects address urgent unmet needs and pent-up demands for our rural and frontier hospitals and systems of care. This included significant gaps in medical technology, equipment, facilities, emergency and life-saving equipment, and mobile care in rural Nevada.

Workforce Recruitment and Rural Access Program (WRRAP)

WRRAP is the largest-funded initiative within the Rural Health Transformation Program, designed to expand and sustain a robust rural healthcare workforce. To address historic provider shortages, the Nevada Health Authority released three targeted RFAs:

- WRRAP Recruitment and Retention
- WRRAP Apprenticeship and Training
- WRRAP Rural Workforce Projects

These coordinated efforts aim to strengthen provider pipelines, expand training opportunities, and support long-term workforce stability throughout rural Nevada.

WRRAP: Provider Recruitment and Retention (R+R)

WRRAP Provider Recruitment and Retention Program received funding requests totaling **$41.9 million from 38 applicants**, thus exceeding the published $32.3 million available for this initial year of funding. The funded projects address critical healthcare workforce shortages across rural Nevada, including gaps in primary care, behavioral health, dental services, specialty care, emergency medical services, and provider recruitment and retention in frontier and Tribal communities. Investments focus on recruiting and retaining primary care providers, behavioral health professionals, dental providers, nurses, emergency medical personnel, and other essential healthcare workers needed to sustain and expand local access to care.

WRRAP: Rural Workforce Projects (RWP)

Funding requests totaled **$4.8 million** from WRRAP RWP applicants, far below the published $25.1 million available for this first year of funding. The initial demand for this specific initiative subcategory did not reach expected levels. With far fewer dollars requested than allocated, NVHA has a responsibility and is evaluating where funds can be **rebalanced, re-aligned, or redirected** within BP1 and looking into

BP2 next year to better meet statewide needs, optimize impact, and ensure that appropriated resources are being fully leveraged to improve rural health care access and outcomes. The funded projects address barriers to increasing rural residency programs and focus on improving and upskilling the current rural workforce. Investments focus on building sustainable residency opportunities as well as creating future rural clinical training directly to high-need healthcare professions.
