Nevada Invests Nearly \$16 Million to Train the Next Generation of Physicians

Under the leadership of Governor Joe Lombardo, Nevada is making a bold and historic investment in the future of health care. The Nevada Health Authority today announced over \$15.7 million in new Graduate Medical Education (GME) grant awards to expand residency and fellowship training programs and grow Nevada's physician workforce, statewide. From family medicine in Carson City to ophthalmology in Las Vegas, these awards will increase Nevada's capacity to train physicians across a wide range of specialties, improving access to quality care for families and communities across the Silver State.

"Strengthening our state's health care workforce has been a cornerstone of my administration, and a robust physician pipeline is essential to the long-term prosperity of our state," said Governor Joe Lombardo. "The GME grant program stands as one of the most tangible expressions of this vision for Nevada — directly funding the training of physicians who will serve Nevada communities for generations to come."

These funds were awarded to nine GME programs by the Nevada Health Authority, using a rigorous and transparent review process in consultation with the GME Advisory Committee. This committee assessed each application based on program quality, workforce impact, and the potential to expand training capacity in communities with the greatest need.

"The strength of Nevada's GME Program lies not only in its funding, but in the integrity and expertise behind the award process," said Stacie Weeks, Director of the Nevada Health Authority. "Thanks to the expertise and dedication of the members of the GME Advisory Committee, these new state investments will have a positive and sustainable impact on Nevada communities."

The total funds allocated to this GME Grant Round are \$15,755,068.00. Physician specialties funded include family medicine, internal medicine, general surgery, obstetrics and gynecology, pulmonary and critical care medicine, diagnostic radiology, ophthalmology, and otolaryngology.

The full list of approved awardee programs is as follows:

- Carson-Tahoe Health - Family Medicine (\$2,707,094.00)
- Dignity Health - Internal Medicine (\$1,722,415.00)
- Dignity Health - Pulmonary & Critical Care Medicine (\$1,279,352.00)
- University Medical Center of Southern Nevada - Diagnostic Radiology (\$2,100,000.00)
- University of Nevada, Las Vegas SOM - Ophthalmology (\$2,995,890.00)
