2.2. Physician GME

Applicant	EIN	Eligible	Score	Requested funding	Recommended funding	Notes	Approved amount	Approval notes
University of Wyoming, College of Health Sciences-Department of Graduate Medical Education	83-6000331	Y	52	\$10,762,100.00	\$1,500,000.00	Funding significantly less than requested because most of the proposed activities are not allowable. Funding proposed will be to fund the Buffalo Rural Training Program (B-RTP), but UW will still need to show 5 yr service commitment plans for future programs and alignment with state GME Council recommendations. There is some important initial work needed to ensure long-standing eligibility of Medicare GME funding for new GME slots in Wyoming. A newly-established GME Council must conduct a robust study, and engage with regional and national organizations and partners to direct new locations and specialties based on the needs of the state. Might consider FM-Obstetrics fellowship in future. Might consider FM-Addiction fellowship in the future if serving rural communities after graduation.	\$6,263,043.10	All expenditures must be allowable and there must be a 5 year service commitment in Wyoming
University of Utah	87-6000525	Y	44.3	\$4,627,699.00	\$9,255,398.00	This proposal closely aligns with goals of the WY Physician GME initiative and works well with other initiatives such as Integrated Primary Care, Workforce Education Start-up, and CAH-B. This proposal also is also tying to 5 year service commitments which are required. Have doubled the requested budget to fund a second cohort. Scored lower by system default because the RFA questions were not written with out-of-state institutions in mind.	\$9,255,398.00	
Memorial Hospital of Laramie County dba Cheyenne Regional Medical Center	83-6000194	Y	32.3	\$2,193,968.90	\$2,193,968.90	The proposed GME Council structure aligns a wide group of stakeholders, including Universities, new opportunities for teaching hospital designations, and faculty development for new clinical training sites for physicians across Wyoming. A one-time investment in consultants and a robust study identifying the needs of the state and long-term funding strategies for GME training is vital in year one for this initiative's success.	\$2,193,968.90	
Powell Valley Health Care Inc.	83-0300467	Y	29.7	\$963,000.00	\$0.00	Newly formed GME Council hosted by CRMC will provide this service.

Casper Natrona County Health Department	\$31,900.00	5%	Y	12.3	Y	1	\$31,900.00			Do not recommend at this time. Project needs more development. Non-comprehensive discussion of sustainability beyond RHTP years. Platform shares population-health info, not patient level info	
Riverton Memorial Hospital dba SageWest Health	\$380,000.00	5%	Y	15.7	Y	2	\$380,000.00			Do not recommend at this time. Project needs more development. Sustainability contingent "pro forma-validated model" with no further explanation.	
Memorial Hospital of Laramie County dba Cheyen	\$9,158,231.00	5%	Y	12.3	Y	2	\$94,500.00			Do not recommend funding. Majority of funds are ineligible uses (99%). Grant cannot be used to fund wages and travel. Does not include actual system procurement. 7.5 million in wages including fringe benefits.	
Amanda DeDiego, PhD, LPC, ART, NCC, BC-TMI	\$83,673.00	5%	Y	11.3	N	-	-		-	Vague sustainability plan post grant period. Many assumptions that potential partners will continue with service, however partners not named. Mentions "...while supporting future expansion of telehealth services as partnerships and funding opportunities grow." Does not identify funding sources needed to maintain the booths. Narrative says new equipment will create shared ownership and buy-in, but does not describe how.	
Memorial Hospital of Laramie County dba Cheyen	\$106,400.00	5%	Y	11	N	-	-		-	Coordination is described indirectly. Otherwise relatively focused and modest application.	
South Big Horn County Hospital District dba Three	\$128,513.95	5%	Y	11	N	-	-		-	VERY broad scope of project(s) and products requested. Starlink mobile units, IPads, "Medication Dispensing Cabinets", remote home monitoring. Starlink makes sense in rural areas for accesibility, but does this all tie together? No firm (or confident) description for sustainability after the program ends. Sustainability section does not provide actionable detail. This is mainly an equipment request.	
High Point Counseling	\$174,940.13	10%	Y	10.7	N	-	-		-	Which technology components address which barriers? Generally explains how virtual collaboration and TMS capacity could support identified initiative goals, but narrative is very broad. Need is not substantiated with current condition and limitation of existing technology, how the requested equipment was sized, projected TMS capacity. Does not identify which providers will connect to which systems, EHR / system interfaces, types of information exchanged. Comments from applicant were generalizations, not specifics. Broad scope, no details.	
Memorial Hospital of Laramie County dba Cheyen	\$695,400.00	5%	Y	10	N	-	-		-	Describes plausible benefit but does not identify current access gaps Are there external providers that will connect? What data is exchanged / interfaces. References to HL7 are generalized.	
Sweet Motivation, LLC	\$462,837.91	5%	Y	10	N	-	-		-	Sustainability Plan is based on assumptions. "...is designed to be financially self-sustaining beyond the grant period. During the initial implementation phase, grant funding will support development and deployment. Long-term sustainability will be achieved through a combination of participating provider contributions, organizational sponsorships, strategic partnerships, and licensing agreements with healthcare organizations, school districts, and community programs seeking access to the platform's educational and care coordination resources." How can the Applicant assume contributions, sponsorships, partnerships, and licensing agreements will manifest themselves post-funding period? The bags alone cost \$114,000.00 for the first year. Description of Interoperability plan is vague.
