Updated April 7, 2026

Budget Narrative

Connecticut's Rural Health Transformation budget narrative has been prepared in accordance with all applicable federal statutes, regulations, and cost principles, including 2 CFR 200, 2 CFR 300, applicable regulations, and state laws. All proposed expenditures are reasonable, necessary, and allocable to the approved project scope and activities, and are consistent with the goals and requirements of the RHT Program. Additionally, all financial management, procurement, and reporting practices will fully conform to federal standards of transparency, accountability, and stewardship throughout the budget period 1 performance period (December 29, 2025 through October 30, 2026 and the permissible spending timeframe for that budget period, which ends September 30, 2027).

A. Personnel Salaries and Wages – Department of Social Services (DSS), Lead Agency

Personnel Total					\$1,427,307
Position Title	Name	Annual	Time	Months	Amount Requested

Connecticut Department of Social Services - RHT Budget Narrative

Updated April 7, 2026

Note: Annual salary estimates for DSS and all state agency subrecipients are based on mid-level salary range of current state employee compensation plans. All position assignments are TBH. Note: For all state staff being funded in whole or in part by the RHT grant, across all state agencies listed in this budget narrative, the state has listed anticipated job classifications and primary responsibilities below to the extent possible based on information available at the time of the grant. All relevant staff will work on appropriate RHT work as necessary based on business needs of implementing grant, including working on different and/or additional RHT projects than listed in this Budget Narrative.

Specific job classifications will also be adapted to extent necessary to implement grant effectively. As onboarding activities move forward, the state may use existing staff on a partial basis for RHTP activities.

Position Title	Job Description
Director of Rural Health Transformation (Executive Assistant 2) (Project Director)	Serve as Director of DSS' new Division of Rural Health Transformation (RHT), responsible for overall monitoring and management of the grant and lead point of contact for CMS. Coordinate with agency program leads across DSS and all state agencies participating in RHTP to ensure the grant is implemented as required by the grant agreement and all applicable federal and state requirements. Oversee overall stakeholder engagement and serve as a point of contact for public and stakeholder inquiries. Until the project director is hired, Mehul Dalal, CT DSS Chief Policy Advisor, will be both the AOR and PD.
Assistant Director of Rural Health Transformation (Durational Project Manager)	Support Deputy Director of Rural Health Transformation – Operations, focusing on administrative and program oversight, including reporting, monitoring, budgeting, and evaluation across the entire RHTP.
Deputy Director of Rural Health Transformation Manager – Operations (Durational Project Manager)	Support the Project Director, focusing on operations, administration, and program oversight. In addition, coordinate among state agencies, units, and other key stakeholders.
Supervising Nurse Consultant	Provide clinical input in general as needed across all RHT projects, especially those implemented by DSS. Design programs, recruit practices, develop standards, and monitor quality, outcomes, and performance of participating practices and contractors.
Deputy Director of Rural Health Transformation and Director of Rural Health Projects (Durational Project Manager)	Support the Project Director with overall programmatic oversight across all RHT participating state agencies, ensuring implementation of projects in compliance with terms and conditions. In addition, oversee all RHT projects administered by DSS. Key roles include overall oversight of provider right-sizing, primary care projects, Value-Based Payment (VBP), direct provider infrastructure support, and behavioral health initiatives, as well as all other projects assigned to DSS.
Assistant Director of Rural Health Projects (Durational Project Manager) (2 staff)	Focus on managing DSS RHT projects regarding their respective areas (i.e., anticipated to be one person focused on primary care, maternal health, and dental health; behavioral health; and anticipated that the other person will be mostly focused on transformation and right-sizing projects).
Principal Cost Analyst	Focus on providing rate development, cost reporting, financial evaluation, and/or related work and oversight, primarily supporting projects related to VBP and Program of All-Inclusive Care for the Elderly (PACE), plus similar work for all RHT projects implemented by DSS.

Connecticut Department of Social Services - RHT Budget Narrative

Updated April 7, 2026

Health Program Associate (3)	Implement various DSS RHT projects, including primary care, provider infrastructure, VBP, and integrated care network.
Director of Program for All-Inclusive Care for the Elderly (PACE) (Durational Project Manager)	Lead implementation of the PACE pilot project.
Lead Planning Analyst (2)	Focus on supporting implementation of various RHT projects implemented by DSS.
Fiscal/Administrative Officer	General administrative support for DSS RHT oversight across the entire RHT Plan and administrative support for RHT projects implemented by DSS.
Staff Attorney 2	Provide comprehensive legal support for DSS implementation of the RHT Plan, including compliance with all applicable federal, state, and agency requirements, as well as legal support for RHT projects implemented by DSS.
Grants And Contracts Specialist	Responsible for developing, preparing and executing all agreements related to RHT grant, including contracts, Statements of Work (SOW) and MOAs and grant agreements with subrecipients, contractors or sister state agencies. Assist in the development and finalization of procurements as needed. Coordinate with project managers to make
	needed changes to initiative scope. Monitor use of grant monies awarded to agency to ensure adherence to all terms and conditions. DSS may use existing staff partially for this position. However, the total hours of all partial staff used will be no more than that of the dedicated staff listed.
Fiscal/Administrative Officer	Responsible for full range of fiscal and administrative functions related to RHTP programs. DSS may use existing staff partially for this position. However, the total hours of all partial staff used will be no more than that of the dedicated staff listed.
Accountant (2)	Provide overall financial support and oversight for DSS's implementation and oversight of the RHT plan, including specific financial support for RHT projects implemented by DSS and coordinating with financial staff across all state agencies participating in RHT. Monitor and update budget. Manage financial transactions for contractors and subrecipients. Create and manage purchase orders, payment vouchers, and receipts for financial transactions. Prepare and submit all federal reporting requirements, including Federal Financial Report (FFR), Federal Funding Accountability and Transparency Act (FFATA), SAM.gov Responsibility/Qualification records, Payment Management System (PMS), and audit reporting (Federal Audit Clearinghouse). DSS may use existing staff partially for this position. However, the total hours of all partial staff used will be no more than that of the dedicated staff listed.

B. Fringe Benefits: \$1,244,471

Fringe Benefits for DSS and all subrecipients are based on the following fringe benefit rates multiplied by requested salary:

Fringe Benefit	Rate
Group Life Insurance	0.17%
Medical Insurance	30.04%
Unemployment Compensation	0.10%
FICA	6.20%
Medicare Taxes	1.45%
SERS	49.23%
Total Estimated Fringe Benefit	87.19%

Connecticut Department of Social Services - RHT Budget Narrative

Updated April 7, 2026

Note: Connecticut Comptroller pays for fringe benefits and direct charges to cost pools based upon actual usage. Comptroller's methodology is approved by U.S. Department of Health and Human Services in Section II of Statewide Cost Allocation Plan agreement. Statewide Cost Allocation Plan for FY 2025-2026:
<https://osc.ct.gov/wp-content/uploads/2025/08/2025-16.pdf>

C. Travel

Purpose	Item	Rate	Cost
Site Visits	Mileage	11 employees annually, at 2,400 miles per employee, cost of \$0.70 per mile, increased by 3% each budget period	\$18,480
Rural Health Summit	Flight and Hotel	3 employees at \$600 each for flights, 2-night hotel, a \$200 per night	\$3,000
Total:			\$21,480

D. Equipment – Not applicable

E. Supplies

Item(s)	Rate	Cost
19 Laptops for Employees	\$1,418	\$26,942
Employee Supply Allowance	25 @ \$750 Prorated	\$11,875
Total:		\$38,817

Justification for all supplies requested by DSS and all subrecipients: Laptops are required for all employees (DSS and subrecipients) to execute grant activities. The unit price, which includes a case, monitor, keyboard, mouse, and power cord, is justified based on a recent agency invoice (available upon request). General office supplies are requested for staff program use, with costs anticipated to increase by 3% annually.

Contractual/Subrecipient Costs: \$151,517,030.53

Method of Selection: Except for sub-grant procedures as described in the following detail, all contractors associated with the RHT grant will be selected according to Connecticut's procurement requirements, either through a competitive bid/RFP process or vendors under contract or already classified as state vendors able to perform the SOW essential to carry out the proposal. In addition, in specific contexts of the RHT grant, the applicable non-state agency subrecipients will be selected in accordance with procedures for a sub-grant, for which contracting procurement standards do not apply. This sub-grant may or may not require a grant application, depending on context, and would always require a grant agreement.

Method of Accountability: For all RHT contractors, grant performance will be defined by the terms of their contract/RFP. For non-state agency subrecipients (governed by a sub-grant agreement), performance criteria are detailed in the sub-grant conditions. All entities must meet a timeline of key deliverables, submit monthly or quarterly reports, and participate in regular check-ins with the designated state agency, who ensures all project deliverables are met.

Period of Performance: All contractors/other non-state agency sub-recipients are expected to be contracted in all budget periods.

Budget and Justification: All budget projections are based upon similar services provided by contractors on recent projects. An itemized budget will be developed and negotiated through the contracting process according to Connecticut's requirements.

Administrative Cost: For all DSS and subrecipient personnel as well as contractors providing administrative services and the indirect administration portion of contracts' costs, total administrative cost is no more than 10% of total grant award.

	Budget Period 1
Personnel Cost (DSS and Subrecipients)	\$6,607,286.00
Contractor Admin Cost	\$8,757,264.59
Total Admin as Percent of Grant Award	9.96%

Minor Renovations or Alterations Cost: For all DSS and subrecipient personnel as well as contractors, total renovation cost is no more than 20% of total grant award.

Applicable Proposal	Anticipated Renovation Cost
Outdoor Recreation Program	\$5,804,000
Rural Health Care Transformation: Rural Hospital Transformation & Rural Health Facility Right-Sizing and Infrastructure Program	\$25,000,000
Total as Percent of Grant Award	19.97%

Electronic Medical Record (EMR) Replacement Cost: For all DSS and subrecipient personnel as well as contractors, total RHTP funds towards Electronic Medical Record replacement cost (if a previous HITECH certified EMR system was already in place as of September 1, 2025) is no more than 5% of total grant award.

Applicable Proposal	Anticipated Maximum Amount to be Paid, if Applicable, for EMR Replacement Cost
Rural Health Care Transformation: Rural Hospital Transformation & Rural Health Facility Right-Sizing and Infrastructure Program	\$7,712,455.30
Total as Percent of Grant Award	5.00%

Provider Payments Cost: For all DSS and subrecipients, total provider payments cost under the primary Use of Funds Category B (payments to health care providers for the provision of health care items or services) is no more than 15% of total funding awarded. Not applicable because none of Connecticut's RHTP projects have Use of Funds Category B as the primary use of funds category. See below for explanation by relevant project.

Potentially Applicable Proposal	Anticipated Maximum Amount to be Paid to Providers for Provision of Items or Services
Rural Health Care Transformation: Care Coordination Support for Primary Care Practices Not subject to 15% cap because the primary use of funds category for this project is Use of Funds Category A: Prevention and chronic disease management. Specifically, these payments are for primary care providers to improve prevention and chronic disease management for their patients, not simply to provide non-covered services.	\$6,844,000
Adult 23-Hour Crisis Stabilization Units Not subject to 15% cap because the primary use of funds category for this project is Use of Funds Category H: Behavioral health, as the key purpose of this project is to enhance access to behavioral health crisis stabilization services, as an alternative to hospital emergency departments.	\$2,000,000
Mobile Health Pilots: Mobile Integrated Health Pilot and Mobile Clinic Pilot Not subject to 15% cap because the primary use of funds category is Use of Funds Category G: Appropriate Care Availability, as the main purpose of this project is to help rural communities right-size their health care delivery systems by testing the use of mobile services as a delivery method.	\$9,700,000
Universal Nurse Home Visiting Expansion Not subject to 15% cap because the primary use of funds category is Use of Funds Category A: Prevention and chronic disease, as the key purpose of this project is to expand universal nurse home visiting services for new parents into rural areas, which is an evidence-based intervention that prevents disease and health conditions. Similarly, this project also improves appropriate care delivery (use of funds category G).	\$4,272,000
Total as Percent of Grant Award (although as explained above, none of these amounts are subject to the 15% cap on provider payments for provision of goods or services)	14.79%

DSS Contract Needs

Evaluator – All Proposals

Scope of Work: Review, design, and implement independent evaluations of select projects. Work under the direction of the Project Director and coordinate metrics and outcomes.

Itemized Budget and Justification:

Evaluation & Consultation			
Budget Category	Contractor 1 Program Evaluator	Contractor 2 Program Consultant	Total
Personnel	\$1,100,000	\$100,000	\$1,200,000
Fringe Benefit	\$200,000		\$200,000
Travel			\$0
Equipment			\$0
Supplies	\$100,000		\$100,000
Contractual			\$0
Other			\$0
Indirect/Admin			\$0
Totals	\$1,400,000	\$100,000	\$1,500,000
Administration costs are expected to be 100% of proposal cost.			

Grants Management – All Proposals

Scope of Work: Support the DSS team to launch the RHT Plan upon award immediately. Directly support DSS' Division of Rural Health Transformation responsible for supporting range of grant start-up activities, including: 1) CMS communications; 2) setting up interagency collaborative structures and communications protocols; 3) developing and maintaining active project management plan; 4) monitoring expenses; 5) supporting procurement, including MOUs, MOAs, RFPs, and/or procurements; 6) supporting activities related to recruitment/hiring of staff; 7) supporting stakeholder input planning and engagement; 8) assisting with on-boarding grant-funded staff and 9) providing subject matter expertise and advice as needed. The highest intensity of support will be for a limited time and will taper off significantly after the first year, as grant-hired staff take over duties.

Itemized Budget and Justification:

Grant Management		
Budget Category	Contractor 1 Grant Manager	Total
Personnel	\$2,250,000	\$2,250,000
Fringe Benefit	\$250,000	\$250,000
Travel		\$0
Equipment		\$0
Supplies		\$0
Contractual		\$0
Other		\$0
Indirect/Admin		\$0
Totals	\$2,500,000	\$2,500,000
Administration costs are expected to be 100% of proposal cost.		

ACCESS Mental Health Expansions- Proposal**Scope of Work:**

Autism Spectrum Disorder (ASD) Service Access: Increase engagement among pediatric, family medicine, and behavioral health providers seeking ASD consultation and support. Ensure timely access to specialized ASD consultation for community-based providers. Develop ASD-specific competencies among pediatric, family medicine, behavioral health, crisis, and emergency care providers.

Enhanced School- Based Mental Health Care: Engage and enroll school-based health center (SBHC) personnel in ACCESS Mental Health for Youth – School Expansion program. Provide psychiatric consultation and clinical guidance to SBHC personnel. Enhance student access to behavioral health services beyond SBHC setting through clinical guidance, resources, and referral support. Build SBHC staff competency to manage behavioral health and referral processes for complex student needs.

Proposal: ACCESS ASD & SB Mental Health		
Budget Category	Contractor 1 Carelton Behavioral Health, Inc.	Total
Personnel	\$295,000	\$295,000
Fringe Benefit	\$89,000	\$89,000
Travel	\$10,000	\$10,000
Equipment	\$0	\$0
Supplies	\$45,000	\$45,000
Contractual	\$2,460,000	\$2,460,000
Other	\$673,000	\$673,000
Indirect/Admin	\$228,000	\$228,000
Totals	\$3,800,000	\$3,800,000
Administration costs are expected to be 6% of the proposal cost.		

Rural Health Care Transformation- Proposal**Regional Collaboratives**

Scope of Work: Convene regional and local leadership of RHT-funded agencies and or relevant agencies with similar service goals and service populations (e.g., local governments, health departments, social service agencies). Share ongoing information and updates on services being implemented under RHT (and or related initiatives) in their region. Develop and maintain high-functioning relationships with local service agencies, including those operated by town or city governments, as well as nonprofit and or non-governmental organizations. Ensure general awareness of new and existing programs among service providers and facilitate connections between them. Serve as an avenue for local and community public input. Liaise with state program managers to jointly develop strategy, focus, and to escalate and troubleshoot implementation and coordination issues.

Improving Primary, Maternal, Behavioral, and Dental Health through Direct Investment and Value-Based Payments (VBPs)**Scope of Work:**

ASOs: As applicable, support practices with NCQA certification and meeting Person-Centered Medical Home (PCMH) standards, electronic health record (EHR) adoption, provide Technical Assistance (TA) on certification and use of emerging tech in primary care

Updated April 7, 2026

(e.g., virtual visits/telehealth, team-based care and virtual team-based, e-consults, behavioral health integration, maternal health screening, postpartum care, mobile dental services).

Facilitate practice readiness to participate in the maternity bundle, including the expanded use of nurse-midwives, doulas, lactation support consultants, and/or other relevant professionals. Support dental practices, such as through EHR upgrades, coordination with mobile services, and school-based services to prevent or slow progression of tooth decay.

VBP Consultant: Continue the work of the primary care payment advisory council to research, design, and implement primary care payment models that best support rural health primary care providers, including Federally Qualified Health Centers (FQHCs), independent, and hospital-owned/affiliated primary care practices. Continue to work on expanding the maternity bundle payment model to rural communities. Continue to work with behavioral health providers to establish a sustainable behavioral health VBP model that addresses and reduces avoidable emergency department (ED) and inpatient hospitalizations. Work with providers and stakeholders on developing a VBP model for dental care, with a focus on access and prevention.

Providers: Eligible primary care, maternal health, dental, and behavioral health providers participating in the program will receive direct support for infrastructure and practice transformation upgrades, consistent with the program's goals.

Connecticut Rural Hospital Transformation, Right-Sizing and Infrastructure Program Scope of Work:

TA Vendor: Select eligible hospitals and other facilities (as detailed in the project narrative) to participate in the program and provide them multi-year TA under the direction of OHS and DSS. Create a comprehensive plan that identifies community health needs, market share, operational efficiencies, opportunities for service-line changes to strengthen healthcare delivery, and transition to value-based care. Vendor must have or build a network of nationally recognized rural health experts with financial, operational, quality, and clinical expertise to conduct detailed market, quality, and financial assessments for each applicable hospital/facility.

Hospitals – Transformation Planning: Participating hospitals must commit to implementing recommendations from TA consultations and action plans. The award will support hospitals in implementing action plans (e.g., financial and operational improvements, workforce recruitment and retention, developing new service lines, and expanding existing service lines). Hospital eligibility includes Connecticut acute care hospitals located in rural towns or serving rural residents within their primary service area.

Hospitals/Facilities – Right-Sizing and Infrastructure: Hospitals and other facilities specified in the project narrative will have the opportunity to apply for right-sizing and infrastructure funds in parallel with transformation planning, supporting identified infrastructure needs that align with the existing right-sizing plan. Eligibility for these funds is not contingent on participation in transformation planning; however, it will require hospitals to submit a plan for state approval.

Eligibility and priority of funding under this project is detailed in the project narrative.

Care Coordination Support for Primary Care Practices

Scope of Work:

Administrative Services Organization(s): Provide data monitoring and analytics, enhanced support to practices, and may provide care coordination functions for practices with a low number of Medicaid-attributed beneficiaries, including on-site embedded support where feasible.

Providers: Primary care practices participating in Medicaid's PCMH program will be eligible to receive a per-member-per-month care coordination fee for their attributed rural patients. In return, practices will coordinate and collaborate with social services, behavioral health, dental, and clinical providers, as well as ASOs, to serve Medicaid beneficiaries. Perform "high touch" coordination and navigation services.

Program of All-Inclusive Care for the Elderly (PACE) Pilot

Scope of Work: Establish the PACE hub to serve as a rural access point for older residents in surrounding rural communities. Hub will expand access to integrated primary, behavioral, and long-term care for older rural adults, reduce avoidable hospitalizations and ED visits through preventive, coordinated care, and support 'aging in place' initiatives.

Integrated Care Network

Scope of Work:

TA Vendor: Conduct a feasibility and policy options analysis to implement one or more ICNs supporting care in Connecticut's rural areas. Per feasibility and options analysis, recommend and recruit health facilities and providers to participate in the program and provide multi-year TA. Create a comprehensive plan to launch and sustain an ICN.

ICN Organization: Participating organization must commit to implementing recommendations from the TA vendor and action plans. The award will support participating organizations to launch an ICN consistent with implementation plans developed by the TA vendor and approved by the state.

Itemized Budget and Justification:

Proposal: Comprehensive Rural Care						
Budget Category	Contractor 1* ASOs and Technical Assistance (names below)	Contractor 2 Integrated Care Organization	Contractor 3 Health Facilities May Include Minor Renovations	Contractor 4 Health Facilities Excluding Renovations	Contractor 5 Regional Organizations (Northeast & Northwest)	Total

Connecticut Department of Social Services - RHT Budget Narrative

Updated April 7, 2026

****Includes costs associated with minor renovations and right sizing. Once assessment of facilities is complete actual costs will be known. The anticipated health facilities include CT's rural hospitals, Charlotte-Hungerford, Day Kimball, Sharon and Windham but may also include other facilities.**

*****Includes direct investment and value-based payments toward rural primary care providers in achieving NCQA PCMH certification, as well as assisting rural primary care, maternal, behavioral health, and dental health providers in improving care delivery. The anticipated health facilities include CT's rural hospitals, Charlotte-Hungerford, Day Kimball, Sharon and Windham but may also include other facilities.**

******Includes right-sizing changes that do not fall into the renovation category, such as resources allocated to primarily Electronic Medical Record (EMR) Replacement and other system changes. The anticipated health facilities include CT's rural hospitals, Charlotte-Hungerford, Day Kimball, Sharon and Windham but may also include other facilities.**

1. Office of Health Strategy (OHS) – Required reporting information for subrecipient

Total:		\$18,387

f. OHS Contracts: \$6,900,000**Tech Enabled Care- Proposal****Health Information Exchange (HIE) Expansion for Rural Providers, EMS, and Skilled Nursing Facilities Units**

Scope of Work: Provide comprehensive project management for HIE Expansion for RHT, including developing and implementing a project plan, budget, timeline, and communication strategy. The position will oversee engagement with rural healthcare organizations, guiding their onboarding, executing necessary agreements, facilitating access to Connie's data services, and providing training and support to ensure effective tool adoption and utilization. Furthermore, the role requires serving as a primary liaison to track project goals, collaborating with partners to improve rural health outcomes, and monitoring and leading efforts to resolve data quality and transmission issues across participating organizations, Connie's technology vendor (CSS), EHR vendors, and internal account management staff.

Rural Health Transformation through Shared Infrastructure and Telehealth Innovation

Scope of Work: Implement a secure, cloud-based IT infrastructure across rural hospitals and FQHCs in Connecticut, enabling modernization of clinical systems, enhanced cybersecurity, and seamless data integration. The project will expand telehealth services statewide, integrating remote patient monitoring, virtual consultations, and behavioral health coordination, with special attention to broadband challenges in rural areas.

Connecticut Healthcare Bed Capacity Tracking System

Scope of Work: Design, build, and implement a statewide automated bed capacity tracking system to provide real-time visibility into hospital bed availability across Connecticut. Supporting efficient patient transfers, resource allocation, and capacity planning across Connecticut hospitals. The project leverages existing state infrastructure and mandates, with sustainability ensured through ongoing participation agreements and consortium cost-sharing.

Connecticut Rural Predictive Analytics and Care Coordination Platform

Scope of Work: Contractor will be responsible for implementation related to Rural Predictive Analytics and Care Coordination Platform program, which leverages predictive analytics and data-driven care coordination to improve outcomes for high-needs patients served by rural FQHCs. SOW includes establishing robust data governance and privacy frameworks, integrating clinical and social determinants data from statewide sources, developing and piloting analytic tools and care-extender models. Project encompasses technology infrastructure setup, workforce training, ongoing evaluation and multi-agency collaboration with clear deliverables. It also includes personnel, technology, FQHC grants and independent evaluation to ensure sustainable equitable access to care.

Updated April 7, 2026

Consumer AI-Powered Care Management Tools

Scope of Work: Contractor will be responsible for implementation related to Connecticut AI-Powered Virtual Care and Remote Patient Transformation initiative that will modernize rural healthcare delivery by supporting hospitals, FQHCs, behavioral health and SUD and independent practices and maternity programs in adopting advanced remote monitoring platforms. AI- powered care pathways and digital patient engagement tools, all integrated with Connie (health information exchange).

Adult Mental Health - Proposal

Adult 23-Hour Crisis Stabilization Units (CSUs)

Scope of Work: Establish 4 adult 23-hour CSUs, including two respite beds in each program, as a diversion from hospital EDs. Sites will be established in the state's rural areas, with the potential of being located near hospitals in those areas. Services provided include screening, assessment, treatment planning, nursing, medication management, clinical interventions, case management, and peer support. Staffing includes prescribers, nurses, licensed independent practitioners (e.g., LCSW, LPC), associate licensed staff (e.g., LMSW), paraprofessionals, and certified peer support staff.

ACCESS Adult Mental Health and Substance Use Expansion

Scope of Work: Ensure timely and equitable access to psychiatric consultation for adult primary care providers (PCPs), particularly those serving rural areas. Consultation activities provided will be multifaceted, including by phone, zoom, in person, workshops, and case consultations.

Conduct a variety of outreach activities to achieve high program awareness and enrollment among rural adult PCPs and family physicians. Improve access to mental health and substance use services for adults, prioritizing rural and underserved areas.

Connecticut Department of Social Services - RHT Budget Narrative
Updated April 7, 2026

Position Title	Job Description
Health Program Associate	Manage letters of qualification for physician compact, help processing technicians ensure all compact applications are complete, and assist with overall management of all compacts that the state is enrolled in, including promoting enrollment in the compact and encouraging rural facilities to consider out-of-state hiring from other compact states.
Processing Technician (2)	Assist in processing licenses for people who are enrolling in compacts and will work with licensed individuals to ensure their applications are complete and work directly with them to help reduce any barriers to enrollment.
Durational Project Manager	Responsible for overall monitoring and management of RHT grant projects implemented by DPH.
Health Program Associate	Participate in planning, organization and implementation of Rural Provider Incentives, Residency Development Grant, and Salary Supplements for Non-Licensed Healthcare Workers programs with responsibility for major components of programs such as staffing, work assignment and distribution decisions.
Grants And Contracts Specialist (2)	Accountable for planning, implementation, management and evaluation of Rural Provider Incentives, Residency Development Grant, and Salary Supplements for Non-Licensed Healthcare Workers programs. Includes program development, liaison and coordination with federal, state and community agencies and organizations, program implementation and administration, program monitoring and assessment.
Fiscal/Administrative Officer	Operationalize, implement, and administer Rural Provider Incentives, Residency Development Grant, and Salary Supplements for Non-Licensed Healthcare Workers programs. Responsible for full range of fiscal and administrative functions related to these programs.
Staff Attorney 2	Perform full range of tasks to provide legal support for all RHT projects overseen by DPH.
Special Investigator	Perform full range of tasks in conducting investigations related to alleged violations of practitioner licensing state laws and regulations pertaining to Rural Provider Incentives, Residency Development Grant, and Salary Supplements for Non-Licensed Healthcare Workers programs. Ensure that practitioners who are licensed, and benefiting from applicable programs, have achieved required standards mandated by state law and are adhering to all relevant program terms and conditions.
Planning Analyst	Responsible for program evaluation of Rural Provider Incentives, Residency Development Grant, and Salary Supplements for Non-Licensed Healthcare Workers programs administered by DPH. Timely and accurate collection of outcome data related to these projects will ensure program effectiveness and impact on state's rural communities.

*Four outfitted mobile vans included for a total of eight vans				

Rural Workforce Development - Proposal

Formalize Certified Nurse Aide #W04 and Medication Administration Training –#W06

Scope of Work: Formalize and expand state's CNA training to make it applicable to all healthcare settings. Create increased practicum opportunities in rural facilities of all types to drive workforce participation in these locations. Formalize medication administration training through the state's community colleges.

Rural Provider Incentives (Awards) –#W01

Scope of Work: DPH will administer the awards program to incentivize healthcare providers to work in rural areas, including \$1 million annually set aside specifically for federally recognized tribes. Providers will receive awards to offset personal expenses (e.g., childcare, housing, etc.) in exchange for committing to a minimum of five years of work in rural areas.

Rural Residency Development Grant –#W05

Scope of Work: DPH will administer a program to support healthcare facilities in rural provider shortage areas to add additional physician residency programs in primary care and behavioral health. Facilities will have the opportunity to apply through an RFP process and, if accepted, will contract with DPH to establish the program and create additional physician residency programs.

Rural School District Behavioral Health – Proposal

Name of Contractors: Child Health and Development Institute (CHDI), Regional Educational Service Centers (RESCs), Center for Connecticut Education Research Collaborative (CCERC), and Rural Community Mental Health Services Provider(s) TBD.

Scope of Work: Child Health and Development Institute (CHDI) will develop tailored, comprehensive school mental health frameworks that integrate mental health promotion, capacity building, and organizational assessments within a Multi-Tiered System of Supports (MTSS). Key activities include staff training in trauma-informed practices and suicide prevention and integrating community-based services. Regional Educational Service Centers (RESCs) will enhance collaboration, provide cost-effective educational resources and training to rural districts, and coordinate mental health telehealth services. Research and evaluation will be led by Center for Connecticut Education Research Collaborative (CCERC) (a 17-university joint initiative) to track student mental health indicators and ensure data quality in collaboration with CHDI, providers, and RESCs. Finally, Rural Community Mental Health Service Provider(s) will utilize a blend of traditional, telehealth, and mobile clinic services, backed by enhanced local support and specialized resources like 211 and 988, to address geographic barriers and provider shortages.

Older Adult Engagement - Proposal

Bridging the Digital Divide

Scope of Work: Provide comprehensive digital literacy and technology support to older adults and individuals with disabilities. Services include assistance with personal devices (phones, tablets, laptops), accessibility features, internet access, online services, and telehealth. The program will also distribute devices (tablets/hotspots), provide tech support to senior facilities, and pilot a Virtual Platform to offer online educational, wellness, and engagement programming to residents in their rural towns.

Promoting Healthy Aging in Rural Connecticut Through Engaging Exercise

Scope of Work: Administer a 10-week exercise program for at-risk physically inactive older adults (multiple comorbidities or risk of falls/illness). Classes meet twice weekly, emphasizing strength, balance, and flexibility exercises and fall prevention education. Health questionnaires are required before and after the program.

Itemized Budget and Justification:

e. DEEP Supplies

Item(s)	Rate	Cost
1 laptop for employee	\$1,418	\$1,418
Employee Supply Allowance	1 @ 750 Prorated	\$625
Total:		\$2,043

f. DEEP Contracts: \$7,000,000.00

Outdoor Recreation Program – Proposal

Scope of Work: Minor alterations of selected trail segments to improve accessibility, e.g., resurface and update drainage to prevent erosion, replace existing gates with ADA-compliant bollards, reduce the slope from access point to trail to be ADA-compliant, etc. Update signage and trail markings to promote connections to nearby State Forests, Parks, amenities, and health services. Collaborate with stakeholders to promote trail use and track usage pre-and post-implementation.

Itemized Budget and Justification:

Proposal: H01-Outdoor Recreation Program						
Budget Category	Contractor 1 Project Evaluation	Contractor 2 Project Planning	Contractor 3 Trail Alterations Designer	Contractor 4 Trail Contractor	Contractor 5 User Education & Engagement	Total
Personnel	\$236,000	\$227,000	\$510,000	\$600,000	\$91,000	\$1,664,000
Fringe Benefit						\$0
Travel	\$9,000	\$9,000	\$12,000		\$4,500	\$34,500
Equipment	\$50,000			\$1,000,000***		\$1,050,000
Supplies	\$4,000	\$8,000	\$16,000	\$200,000	\$4,000	\$232,000
Contractual		\$454,000	\$1,028,000*	\$1,000,000**	\$50,000	\$2,532,000
Other	\$1,000	\$2,000	\$4,000	\$1,200,000	\$500	\$1,207,500
Indirect/Admin	\$12,000	\$28,000	\$74,000	\$160,000	\$6,000	\$280,000
Totals	\$312,000	\$728,000	\$1,644,000	\$4,160,000	\$156,000	\$7,000,000

Administrative costs are expected to be 4% of the proposal cost.

* The budget estimate is based on the contractor's use of subcontractors for specific tasks such as facilitating public feedback sessions, surveying the sites, graph design of maps, landscape architect planting plans, hydrology analysis, and based on DEEP's experience working with design firms such as Fuss & O'Neill, Conte Company, and VHB for similar projects. This will be updated once contracts are executed.

** The State plans to contract with a Trail Contractor to begin carrying out alterations to the existing Air Line Trail State Park in nine communities to make the trail more accessible to more residents and health program providers. Anticipated costs to be incurred could include, but would not be limited to, vegetation planting and management, stormwater erosion management, trail resurfacing, installing access point vehicle barriers, parking lot line striping and signage, and installing trail wayfinding and other signage based on the trail alterations design plans to be developed.

The budget estimate is based on the contractor's use of specialized subcontractors for the separate activities are based on DEEP's experience working with contractors such as J&J Tree Service, Earth Dynamics, Safety Marking LLC, and Farmington Displays for similar projects. This will be updated once contracts are executed.

*** The budget estimate is based on the contractor will subcontract for the use of specialized equipment that could include, but would not be limited to, wood chippers, tree removal cranes, bucket trucks, and loaders are based on DEEP's experience working with contractors such as J&J Tree Service, Earth Dynamics, All Habitat Services, and Machnik Brothers for similar projects. This will be updated once contracts are executed.
